Dear Myke:

This letter pertains to the Revised Draft Environmental Impact Report of August 2003.

On page ES-30 of the Executive Summary is presented Plan A and B to the Modified Enhanced Minimum Plan as proposed by Friends of the Napa River (FONR). There is no hydrological data to support a position that either of these plans would enhance flood control or lower the water surface elevation in the river during storms.

The obvious motivation of FONR to propose these plans is to further their objective of moving all human habitation away from the river as far as possible.

Measure A was voted for with the promise that the tax moneys raised would only be used for flood control and to improve water quality. Therefore, if either of these Plans is approved, no Measure A funds can be used in their implementation.

Sincerely,

Warren H. Young
